Status	Stale and unowned
Last reviewed	2025-11-28
Warning	Conflicts with May 2026 customer email naming Finance Operations as final SEPA approver

Purpose

This procedure describes how the Proximus Belgium payroll payment file is approved and released. It covers the approval pack, control totals, release deadlines, and fallback contacts.

Approval owner

The old procedure lists Proximus HR Shared Services as final payment approver. Recent customer email and Teams context state that Finance Operations is the final approver for the SEPA payment total from May 2026. Treat this document as stale until ownership is updated.

Release deadline

The payment file must be ready by D-1 at 11:00. If the file is not ready by this time, SD Worx must notify the account manager and Proximus Finance Operations.

Approval pack

The pack includes employee count, total gross salary, total net salary, employer contributions estimate, variance against previous month, negative net salary list, bank account changes, off-cycle corrections, and one-off payment explanations.

Control rules

The payroll consultant checks that the total net amount in the payroll system matches the SEPA file total. Any mismatch blocks release until integration support confirms the cause. The payment file must not be split unless the service lead approves.

Escalation

If approval is missing, contact Finance Operations first for payment totals, HR Shared Services for HR input validation, then the SD Worx account manager if the payment deadline is at risk.
